

Exact PipeCut 360 HYDRA

A revolutionary pipe saw that delivers excellent cutting results in wet, even underwater conditions with exceptional safety. The required power can be sourced from a compact hydraulic power pack or an excavator, making it operable in locations even outside the electrical grid.

- Safe and fast to use, attaches firmly to the pipe
- Precise cut, gripping unit guides the saw around the pipe
- Strong and robust, yet compact structure
- For all pipe materials with appropriate blade
- Works for fixed or unattached pipes
- Can simultaneously cut and bevel cast/ductile iron pipes

Technical data

Blade diameter	140 mm (5.6"), 165 mm (6.50"), 180 mm (7.2")
Mounting bore	62 mm (2.44")
Weight	18.5 kg (41 lbs)
Range of use, pipe OD	75 mm–360 mm (3"–14")
Max pipe wall	25 mm (1") steel, 45 mm (1.8") plastics
Hydraulic pressure max.	150 bar (2,200 PSI)
Hydraulic volume max.	25 l/min (6,6 GPM)
Oil quality requirement	32, biodegradable oil recommended for environmental reasons
Operating temperature	+40°C...-20°C / 104F...-4F
