

MAX40V Magnet Drill

Metal guard system supplied as part of a comprehensive kit package

An upgraded version of the 803045 MAX40, the MAX40V offers a 145mm Stroke, almost 50% more than its predecessor. With this increased range the MAX40V comfortably accommodates cutters up to 110mm for deep broaching or the VersaDrive Rapid-Lock Weldon Adapter with VersaDrive tooling, opening up 1,000s of time saving solutions from the whole VersaDrive system.

This huge increase in versatility and functionality comes in a machine that is 10% lighter than the MAX40, at just 10.5kg, and boasts almost double the magnet strength at 1500kg.

The MAX40V also sees an increase in power with its 1150w motor and offers countersinking up to 25mm, with the ability to take a chuck for added flexibility of use.

THE ULTIMATE MACHINE FOR LIGHT WEIGHT BUT POWERFUL MAGNET DRILLING, BROACHING AND COUNTERSINKING

Technical Specifications

CUTTER SIZE RANGE	12 - 40mm TCT
MAX CUTTER CAPACITY	110mm TCT
TWIST DRILL CAPACITY	16mm
