Outershield® 71E-H

TOP FEATURES

- Rutile flux cored wire for high quality welding with M21 gas.
- Excellent operator appeal due to superior welding characteristics.
- Superior product consistency with optimal alloy control.
- H4 class in 1.6mm diameter.
- Full out-of-position capability with high deposition rates.
- ABS, DNV-GL, LRS, BV, CWB, RINA, TUV, DB, RMRS approved

TYPICAL APPLICATIONS

- Shipbuilding
- Steel construction
- HYPERFILL

TEST RESULTS

Test results for mechanical properties, deposit or electrode composition and diffusible hydrogen levels were obtained from a weld produced and tested according to prescribed standards, and should not be assumed to be the expected results in a particular application or weldment. Actual results will vary depending on many factors, including, but not limited to, weld procedure, plate chemistry and temperature, weldment design and fabrication methods. Users are cautioned to confirm by qualification testing, or other appropriate means, the suitability of any welding consumable and procedure before use in the intended application
