

S-LINE

Essential protection, enhanced performance.

EXPECT MORE FOR LESS.

The Kemppi S-line of auto-darkening welding masks makes high-quality vision, comfort, and safety technologies more accessible for every welder. Every model offers Vision+ technology in ADF and additional high-performance features to help you do your best work.

S1020

The essential ADF welding mask.

The S1020 is a simple, highly effective light-weight ADF mask with Vision+. With a 1/1/1/2 rating, four darkening sensors, and a comfortable headband, it offers all-day protection and good vision.

S1030

Switch modes without pausing.

Easy-to-reach controls on the outside of this ADF mask allow you to quickly switch between welding and grinding modes and adjust shade levels without having to raise the hood. Comfortable headband and Vision+ make the S1030 a great choice for everyday use.

S1040

Keep everything in view.

A large viewing area and remote controls give you a better view of your workspace and the ability to easily adjust sensitivity, delay, shade, and usage mode with the hood down. The S1040 also features 4 darkening sensors, Vision+, and a 1/1/1/2 rating.

S1065

TH3
class

The perfect view, the purest air.

Designed to perform in tough environments. The TH3 class air filtration system removes 99.8% of particles and dust. The large viewing area offers clarity in all situations (1/1/1/1). The B impact-rated welding mask provides superb shielding.
