

Master™ Series

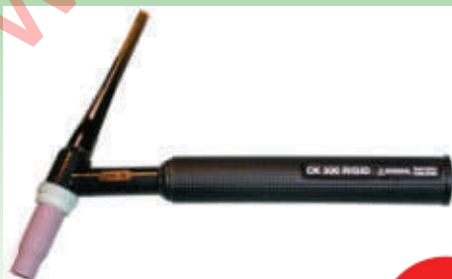

CK230 Water Cooled
300 amp ACHF or DCSP @ 100%
8-1/4 in(20.9 cm) 3-3/4 oz(106 gm)

The CK230 series torch, at 300 amps, is the highest rated (100% duty cycle) torch with the smallest head available on the market today. The larger water jacket design will run cooler giving longer life torch consumables and the torch body. Higher amperage capacity allows users to fully achieve 1/8"(3.2mm) tungsten capability on thick aluminum jobs.

CK512 Water Cooled
500 amp ACHF or DCSP @ 100%
9-1/4 in(23.5 cm) 6-3/4 oz(191 gm)

The CK510 is the smallest most versatile 500 Amp torch on the market. Specially designed consumables allow this torch to use up to 1/4" tungsten for heavy-duty welding. Standard 18 series consumables can also be used for smaller head configurations.

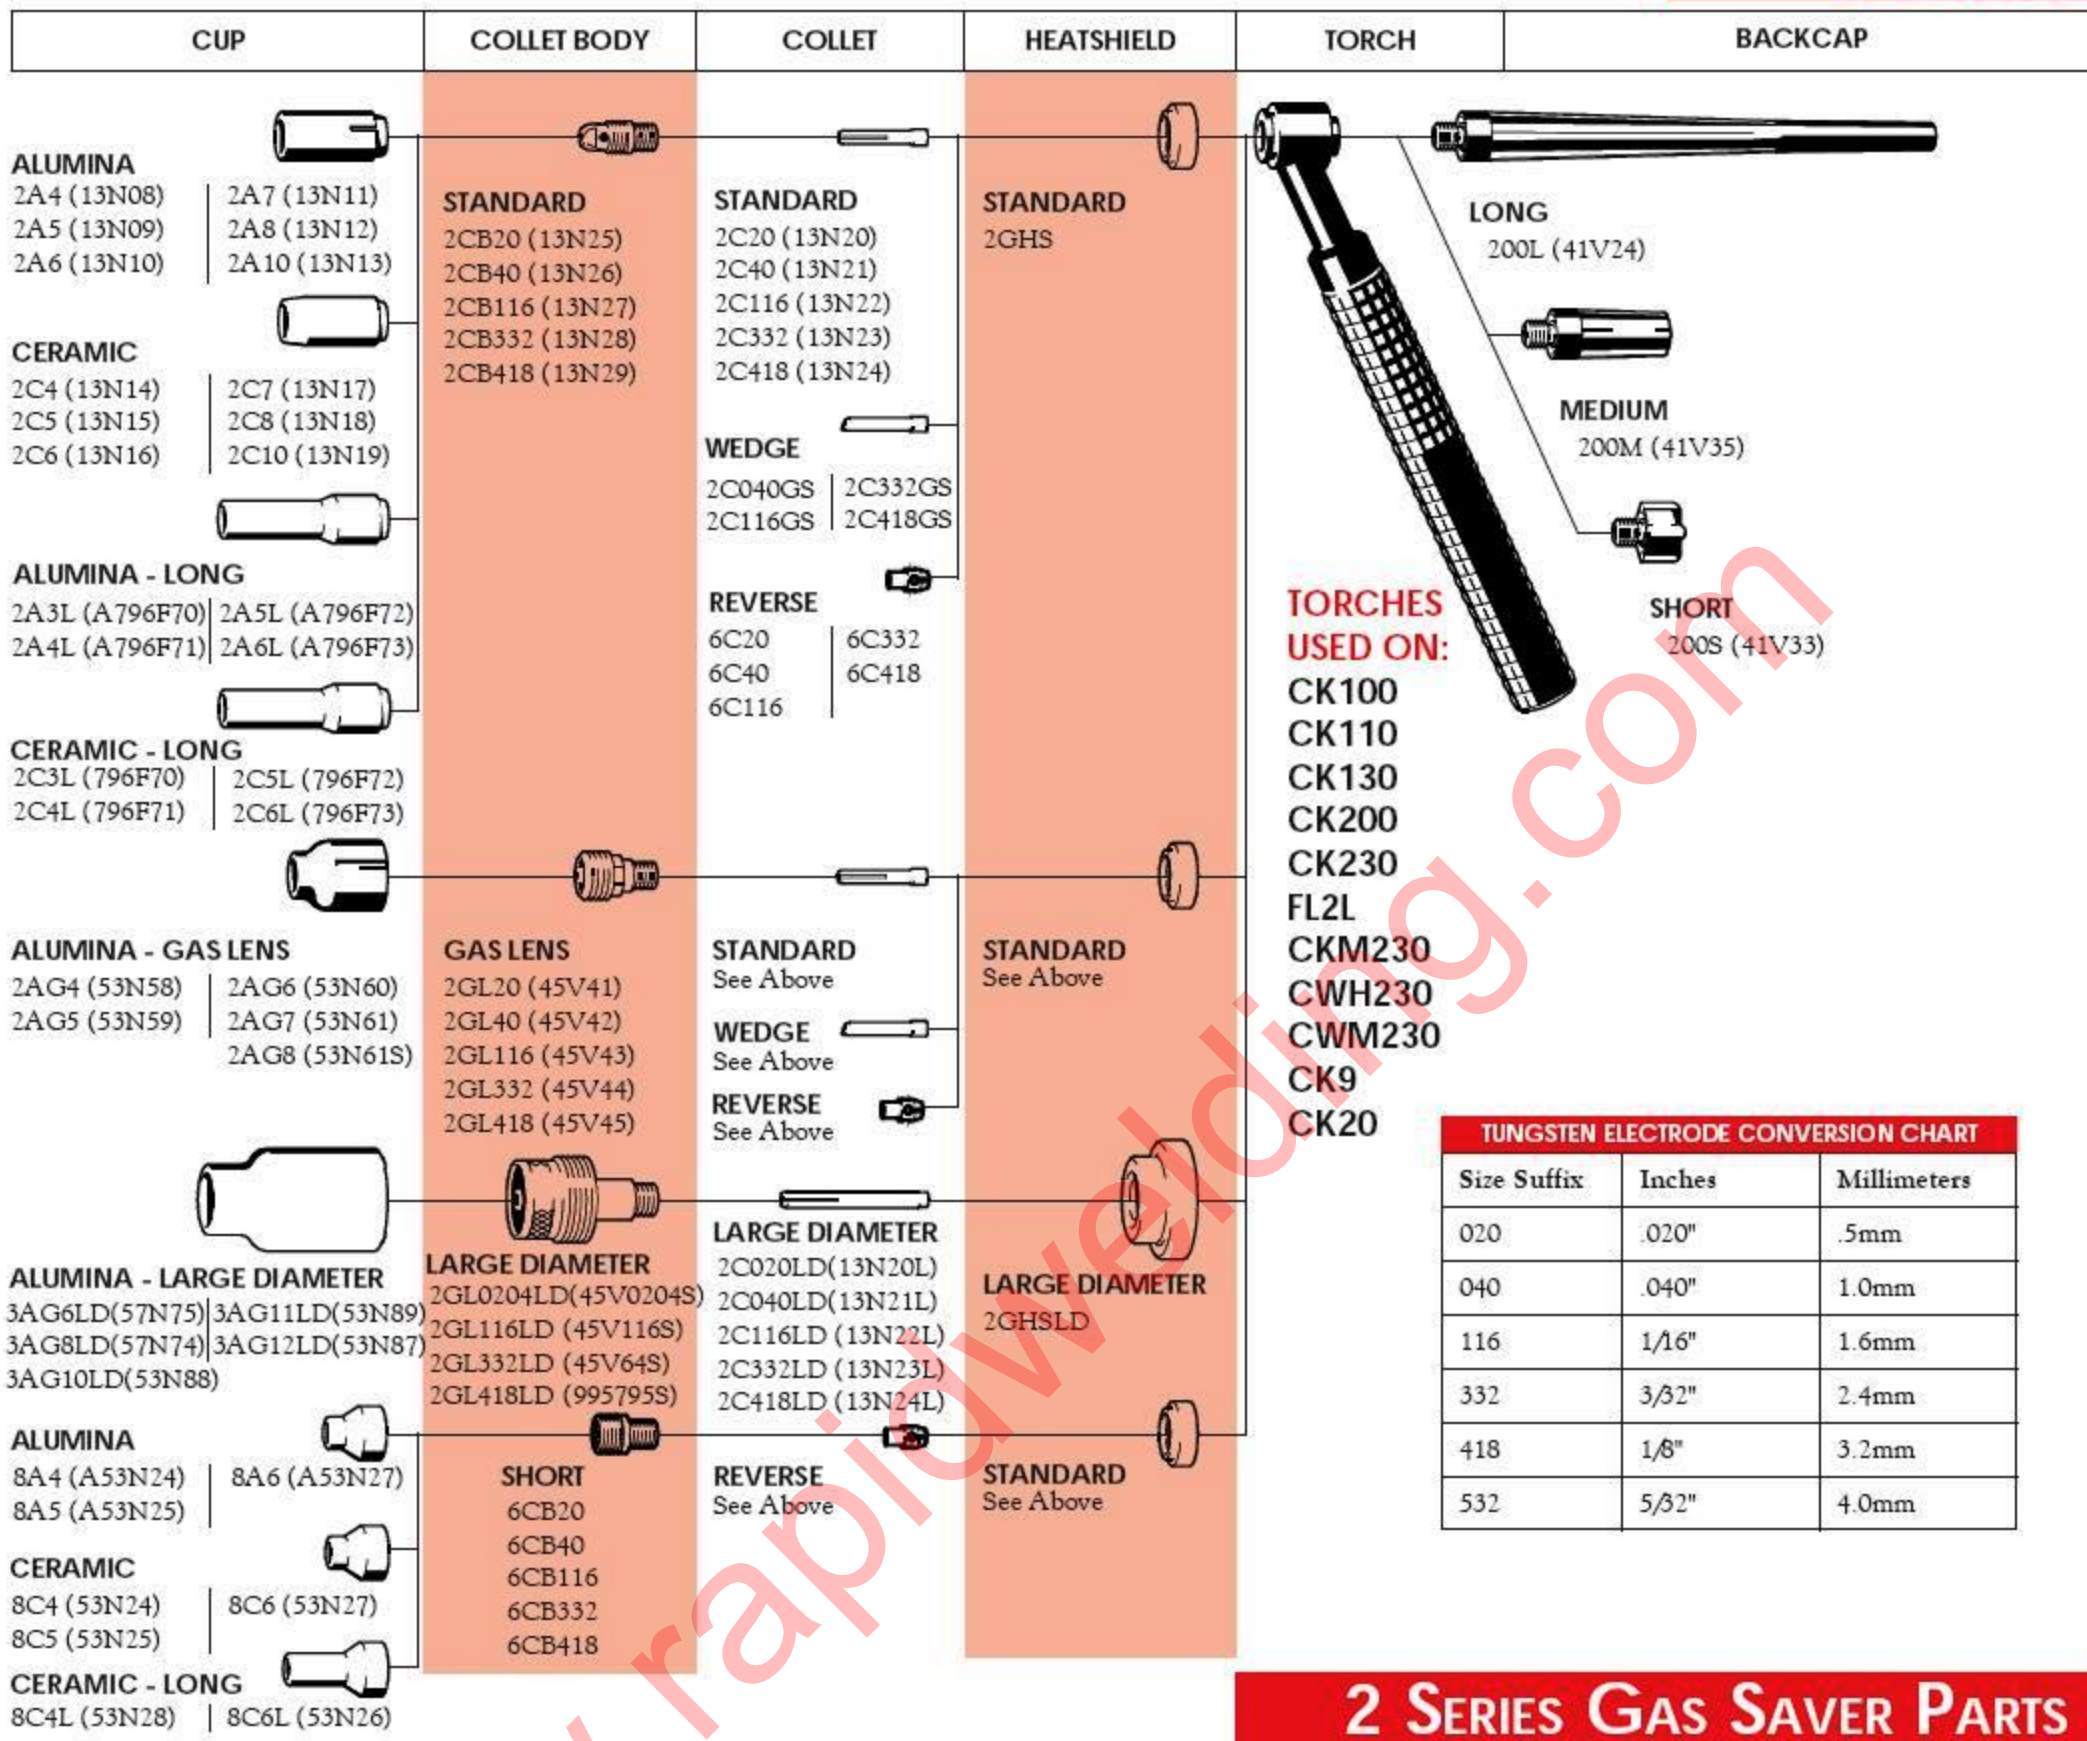

CK300 Water Cooled
350 amp ACHF or DCSP @ 100%
9-1/2 in(24.1 cm) 6-1/2 oz(184 gm)
